

# Type of plating

|                 | Type of plating             |
|-----------------|-----------------------------|
| Electro plating | Zinc plating                |
|                 | Zinc-iron alloy plating     |
|                 | Zinc-nickel alloy plating   |
|                 | Tin-zinc alloy plating      |
|                 | Nickel plating              |
|                 | Copper plating              |
|                 | Tin plating                 |
|                 | Hard chromium plating       |
|                 | Decorative chromium plating |

|                     | Type of plating                         |
|---------------------|-----------------------------------------|
| Electroless plating | Ni-medium P plating                     |
|                     | Ni-medium PB plating                    |
|                     | Ni-B plating                            |
|                     | Ni-high P plating                       |
|                     | Ni-low P plating                        |
|                     | Chemical Tin plating                    |
|                     | Ni-P PTFE plating                       |
| others              | Anodizing                               |
|                     | Zn/Al high corrosion resistance coating |
|                     | Chromate coating                        |
|                     | Phosphate coating                       |
|                     | Black Ironoxide coating                 |
|                     | special pre-treatment                   |
