SASANO-MEGUMI

Sasa no Megumi
Moisture Soap

POINT 01

Thoroughly focused on skin-friendliness

Sasa no Megumi Moisture Soap is made with two fatty acids, C14 Myristic acid and C16 Palmitic acid, that lather easily and produce a fine lather, thereby reducing irritation to the skin. In addition, this product is free of paraben, fragrance, colorant, and alcohol, and has been designed to thoroughly remove the burden on the skin.

POINT 02

Micronized bamboo charcoal is used

Bamboo charcoal is used as a cleaning ingredient because of its excellent adsorptive power. Bamboo charcoal easily blends with sebum in the pores, which causes odor, so just rolling the foam gently protects the skin and cleanses away dirt.

POINT 03

*Contains 54% kumazasa leaf extracted**

We specialize in kumazasa and are dedicated to extracting high-purity kumazasa extracts using our advanced technology. Moisture Soap is a hypoallergenic bamboo charcoal soap that contains 54% of kumazasa leaf extract.

※natural moisturizing ingredient

Fluffy bubbles!

Bamboo grass is a plant
indigenous to Japan.

How about Moisture
Creamy Gel?
