

Nihon Self Medical Group

Since 1982, we have been researching and developing
electric potential treatment equipment in Japan.

Preventive medicine is a science for preventing diseases and improving
physical and mental health.

It aims at building a strong body with an immune system that can battle against diseases.

MEDIC was born in the perspective of preventive medicine
in the hope of building a healthy society with longevity.

MEDIC M14000SX is a household medical equipment which is
Authorized by the Ministry of Health, Labor and Welfare in Japan
as a controlled medical device,

So you can use it without any concerns.

Our products are used by over 5 million customers all over the world.

Manufacturer of MEDIC - Medical Electronic Industry Co., Ltd.

Our products are manufactured in our factory which have acquired the world's common standard
for the regulations of medical equipment, called "ISO13485" (Medical Device) JQA-MD0013.
