

## Company Profile

Company name MZ VINA COMPANY LIMITED

Established 2023年 6月 1日

Capital USD 151,000.00

Shareholder MZ Co., Ltd.

CEO Kiyohiko Furuoka

Location Street NB4, My Xuan B1-Tien Hung Industrial Zone, My Xuan Ward, Phu My, Ba Ria-Vung Tau Province, Viet Nam

## Business content

1. Freon gas business  
Freon gas treatment  
Freon gas sales (R22,R410A,R32, etc.)  
Sales and rental of collection containers  
Freon gas collection  
Freon gas analysis

※ "Z Freon" is a trademark of MZ Co., Ltd.

2. Air conditioner collection business
3. Air conditioning tool sales and service business  
Sales and repair of tools made by ICHINEN TASCO CO., LTD.

## Owned equipment

- Freon regeneration device 10kg $\times$ 1unit (simplified distillation type)
- Freon simple analyzer
- Gas Chromatograph

## Greetings from MZ Group Representative

Since its founding on June 21, 2001, MZ Group has been working on business to help customers' comfortable lives and solve environmental problems through air conditioning and electrical equipment.

In terms of environmental issues, we are particularly focused on global warming countermeasures, and are promoting the construction of a society that reclamation fluorocarbons, which have a high GWP.

With the Kigali Amendment tightening regulations on the production and import of fluorocarbons worldwide, the MZ Group is making effective use of resources by reusing fluorocarbons.

We intend to contribute to global environmental protection not only in Japan but also in Vietnam.

Think about the next generation, and the future of the next generation.

At the MZ Group, all of our employees are striving to deliver services that satisfy our customers and contribute to society with our "experience" cultivated through our "achievements" in Japan and our "technical capabilities". We therefore ask for your continued support in the future.

MZ Co., Ltd.  
CEO Akira Mizohara

MZ VINA COMPANY LIMITED

Realizing the formation of a fluorocarbon resource sustainable society.

MZ VINA is actively working to improve the environment surrounding fluorocarbons and take measures against global warming.

Realized the construction of a total reclamation system for the collection, transportation, treatment, and supply of fluorocarbons. We provide services that satisfy our customers in all areas.

## About environment surrounding fluorocarbons in Vietnam

In Vietnam, there was no law on fluorocarbons, but on January 7, 2022, the "Regulations on the Reduction of Greenhouse Gas Emissions and Protection of the Ozone Layer" were enacted. As a result, from January 1, 2024, it will be mandatory to recall regulated materials that are no longer used in equipment or products.

MZ VINA utilizes the technology and knowledge cultivated in Japan to properly collect fluorocarbons, reclaim them, and sell safe and secure fluorocarbons to customers.

## Freon gas business

One-stop service from on-site Freon recovery to treatment, sales, and arrangement of collection containers!

- 
**Collect** We collect fluorocarbons from on-site air conditioners and refrigerators/freezers.

---

- 
**Process** We carry out regeneration processing by a simple distillation method, CO2 emissions can be reduced by about 1/20 compared to destruction processing.

---

- 
**Analysis** We have established in-house standards that exceed Japanese JIS standards, and have conducted analyzes four times to provide safe and secure products to our customers.

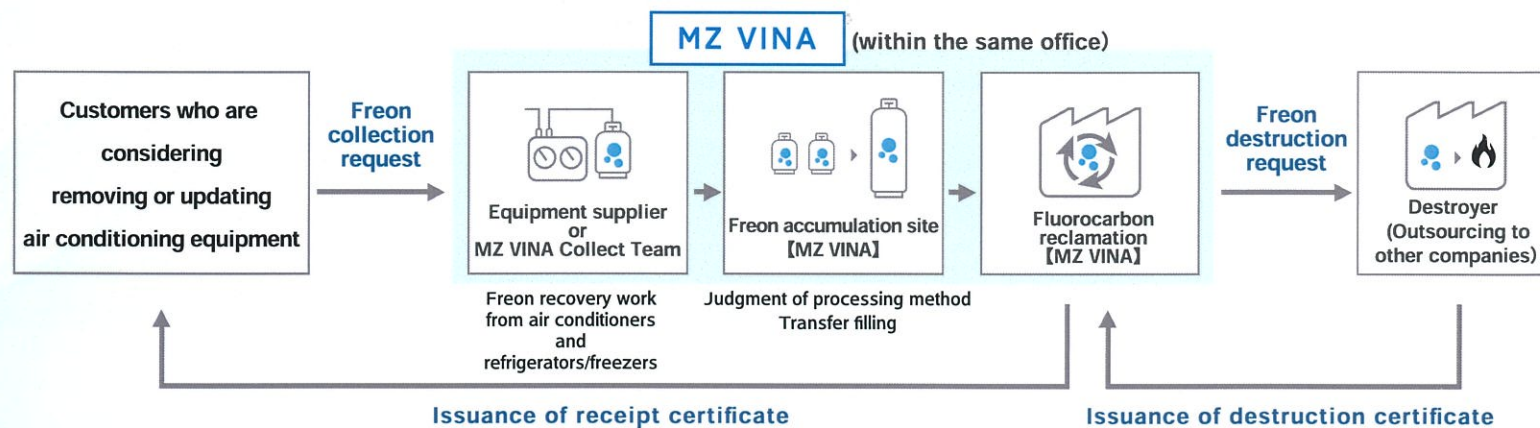

---

- 
**Sale** We only sell high-quality reclamation freon that meet the same standards as new.

---

- 
**Container** We have a large inventory of collection containers. Available for sale and rental.

## Fluorocarbon processing request flow

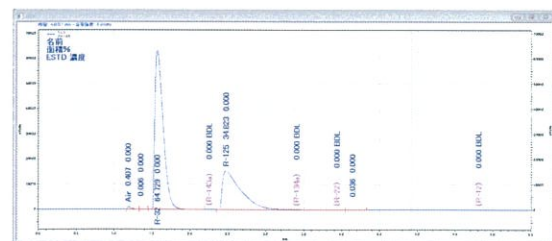

## Thorough quality control

By focusing on analysis, which is the most important factor in reclamation and selling freon, we manufacture safe, secure and high-quality reclamation freon.

Analysis is performed using a gas chromatograph.

We decide whether to sell or not based on the analysis results.  
 ※The figure above is an example of analysis results for R410A.

※ "Z Freon" is a trademark of MZ Co., Ltd.

## Air conditioner collection business

Please bring in an air conditioner that contains freon.

We will take over the air conditioning equipment that has been renewed or removed as industrial waste.

All collected equipment will be disassembled and entrusted to a reclamation company.

In addition, please bring the air conditioner with the pump down or with the valve closed, and with the Freon stopped in the outdoor unit.

We collect Freon in our factory and treat it appropriately.

Actual collection scene

We can arrange the delivery for you.

In that case, please feel free to contact us.

Outdoor units removed on site. Pumped down.

Freon recovery at our company. Outdoor units are disassembled and sorted.

Reclamation each resource

## Air conditioning tool sales and service business

We sell and repair designated air conditioning tool manufacturers.

We are the agent in Vietnam of the air conditioning tool manufacturer "ICHINEN TASCO Co., Ltd." We sell and repair. Please feel free to contact us.

We also hold workshops on how to handle tools and how to collect fluorocarbons. Please contact us if you would like to have a lecture on a business trip or a tour and lecture at the MZ VINA factory.
