

# GAS AUTOMATIC RICE COOKERS

MODEL CRA-100N (Double Deck)

MODEL CRA-150N (Triple Deck)

## COMET GAS AUTOMATIC RICE COOKERS

MODEL CRA-100N (Double Deck)

MODEL CRA-150N (Triple Deck)

### GENERAL

Each deck is for cooking of 7kg(9liters)rice. Heavy duty aluminum casting rice pot provides good cooking of rice. Body is completely insulated. Positive spring balanced door is standard. Heated by new high input "Ring Burner" which gives 9,000kcal/h each.

### ELECTRIC IGNITION

Pushing the start/stop key to "ON" starts the electronic ignition system and at the same time allows gas to flow to the burner. When the burner ignites, a flame sensing device confirms ignition and shut off the spark ignition system. If no burner flame is sensed, the gas supply is shut off.

### AUTOMATIC COOKING

Rice is cooked automatically. When rice is cooked completely, gas supply to the main burner will be automatically shut off and a cooking light is turned off with a buzzer going. The temperature at the bottom of a rice pot is conducted to the "Thermister Temperature Sensor" located under the rice pot. It controls gas solenoid valve to shut off gas supply. Three rice cooking menus : white rice, mixed rice and gruel are standard.

### COOKING ADJUSTMENT

Cooking can be adjusted by turning cooking adjusting key on the control panel. This device can be used when softer or harder rice is preferred.

### CONSTRUCTION

Both sides and back exterior are 0.7mm thick stainless steel. Front door panel is stainless steel. Rice pot and lid are heavy duty aluminum casting. These rice cookers is not compatible with the old models (CRA-100K9 and CRA-150K9)

### PRE-SET TIMER (MODEL CRA-100N-PS, CRA-150N-PS)

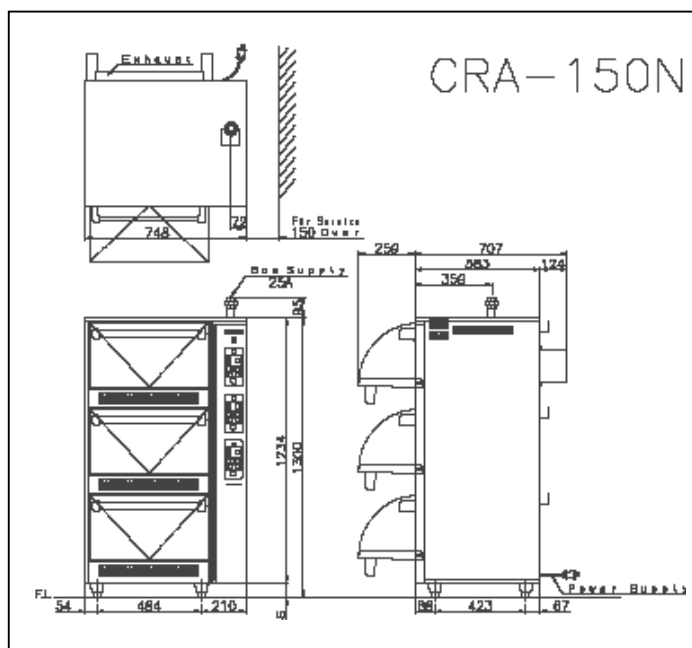

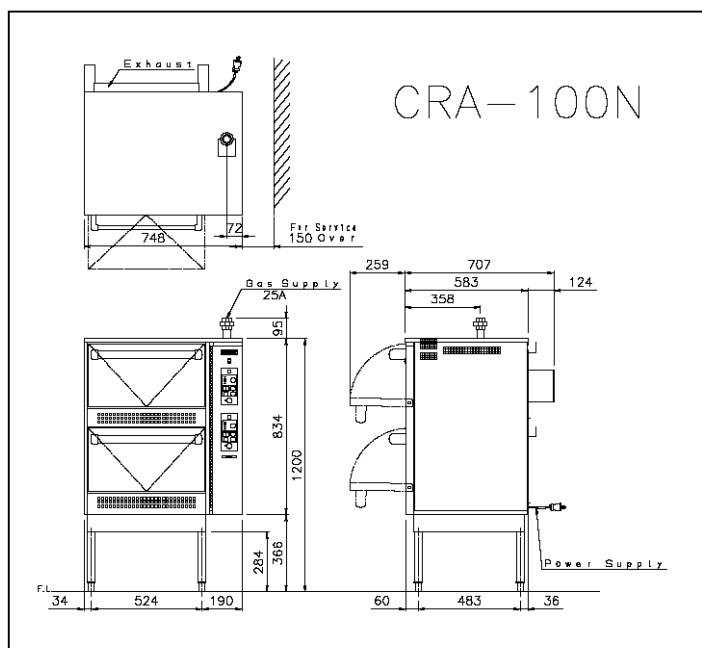

Rice cooking can be started by setting time on the pre-set timer. The starting time can be set independently at each deck.
