-Nourish yin and promote yang-
Cordycep sinensis

Cordycep sinensis has been well known as one of traditional medicines or luxurious foods in China for centuries and it is said to Nourish yin and promote yang.

It is a kind of mushroom which grows in the mountainous region in Tibet of altitude 4200-6400m. The functional components are mainly polysaccharide, cordycepin and Adenosine. This product is directly derived from Tibetan strains and produced at low oxygen and low temperature similar to Tibet. DNA tested and verified through National Institute of Health genebank.
